## Lab 04 - Gerenciamento de Usuários e Grupos

Introdução à Sistemas Operacionais

Aluno: Gustavo Pereira de Almeida

**RA**: 01242044

No terminal do Lubuntu, execute:

1. Crie um usuário chamado "harry".

```
sudo adduser harry
                                                                                Copiar código
 sudo adduser harry
[sudo] password for your_user: ****
Adding user `harry' ...
Adding new group `harry' (1002) ...
Adding new user `harry' (1002) with group `harry' ...
Creating home directory `/home/harry' ...
Copying files from `/etc/skel' ...
Enter new UNIX password: *******
Retype new UNIX password: *******
passwd: password updated successfully
Changing the user information for harry
Enter the new value, or press ENTER for the default
        Full Name []: Harry Potter
        Room Number []:
       Work Phone []:
       Home Phone []:
       Other []:
Is the information correct? [Y/n] Y
```

2. Crie um usuário chamado "hermione".

```
[sudo] password for your_user: ****
Adding user `hermione' ...
Adding new group `hermione' (1003) ...
Adding new user `hermione' (1003) with group `hermione' ...
Creating home directory `/home/hermione' ...
Copying files from `/etc/skel' ...
Enter new UNIX password: *******
Retype new UNIX password: *******
passwd: password updated successfully
Changing the user information for hermione
Enter the new value, or press ENTER for the default
       Full Name []: Hermione Granger
       Room Number []:
       Work Phone []:
       Home Phone []:
       Other []:
Is the information correct? [Y/n] Y
```

3. Crie um usuário chamado "ron".

```
sudo adduser ron

bash

Copiar código

sudo adduser ron
```

```
[sudo] password for your_user: ****
Adding user `ron' ...
Adding new group `ron' (1004) ...
Adding new user `ron' (1004) with group `ron' ...
Creating home directory `/home/ron' ...
Enter new UNIX password: *******
Retype new UNIX password: *******
passwd: password updated successfully
Changing the user information for ron
Enter the new value, or press ENTER for the default
       Full Name []: Ron Weasley
       Room Number []:
       Work Phone []:
       Home Phone []:
       Other []:
Is the information correct? [Y/n] Y
```

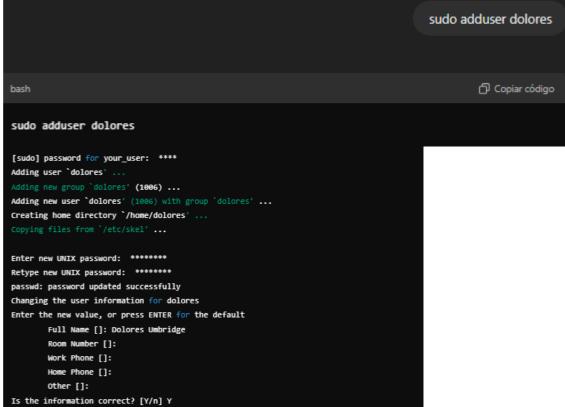

4. Crie um usuário chamado "draco".

```
sudo adduser draco
                                                                            Copiar código
bash
sudo adduser draco
[sudo] password for your_user: ****
Adding user `draco' ...
Adding new group `draco' (1005) ...
Adding new user `draco' (1005) with group `draco' ...
Creating home directory `/home/draco' ...
Enter new UNIX password: *******
Retype new UNIX password: *******
passwd: password updated successfully
Changing the user information for draco
Enter the new value, or press ENTER for the default
        Full Name []: Draco Malfoy
        Room Number []:
        Work Phone []:
        Home Phone []:
        Other []:
Is the information correct? [Y/n] Y
```

5. Crie um usuário chamado "dolores".

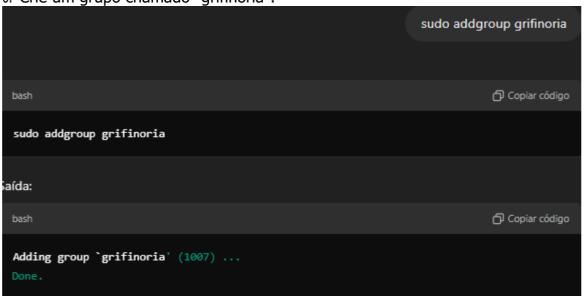

São Paulo Tech School - SPTECH

www.sptech.school / atendimento@sptech.school

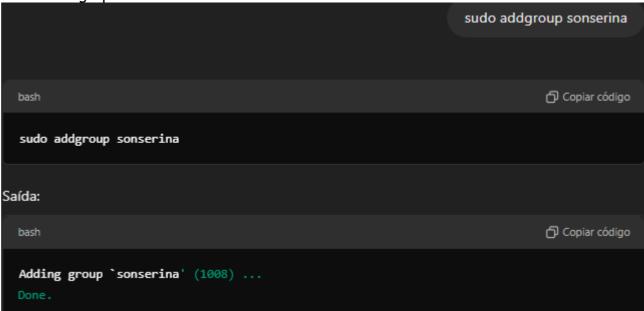

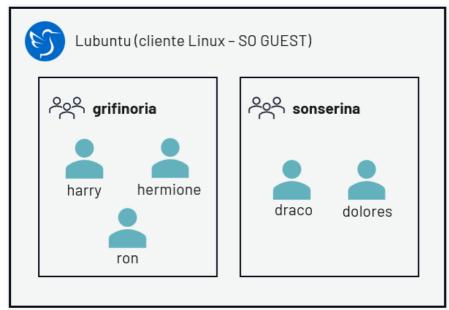

6. Crie um grupo chamado "grifinoria".

7. Crie um grupo chamado "sonserina".

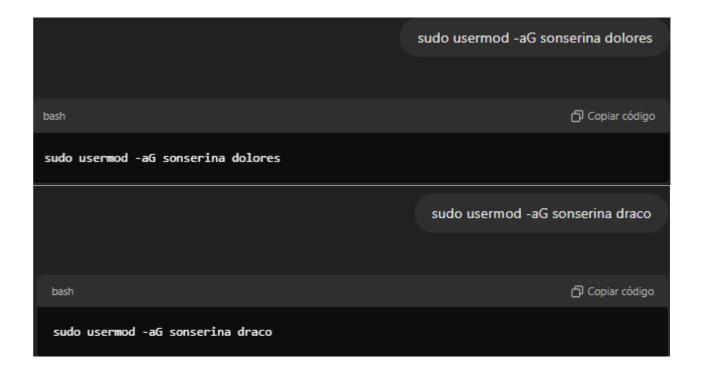

8. Adicione cada usuário em seu devido grupo, conforme ilustração a seguir:

	sudo usermod -aG grifinoria harry
bash	ල් Copiar código
sudo usermod -aG grifinoria harry	
	sudo usermod -aG grifinoria hermione
bash	ලි Copiar código
sudo usermod -aG grifinoria hermione	
	sudo usermod -aG grifinoria ron
bash	ල්) Copiar código
sudo usermod -aG grifinoria ron	

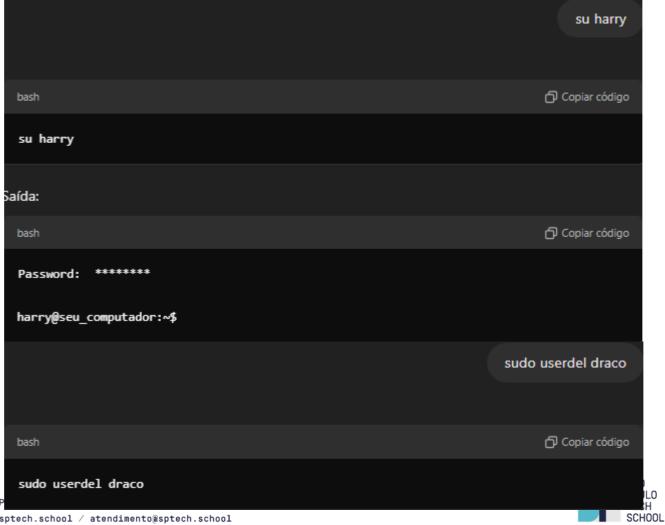

9. Adicione somente o usuário "harry" ao grupo sudo (vamos dar superporderes ao harry):

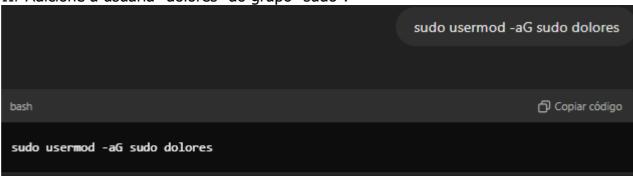

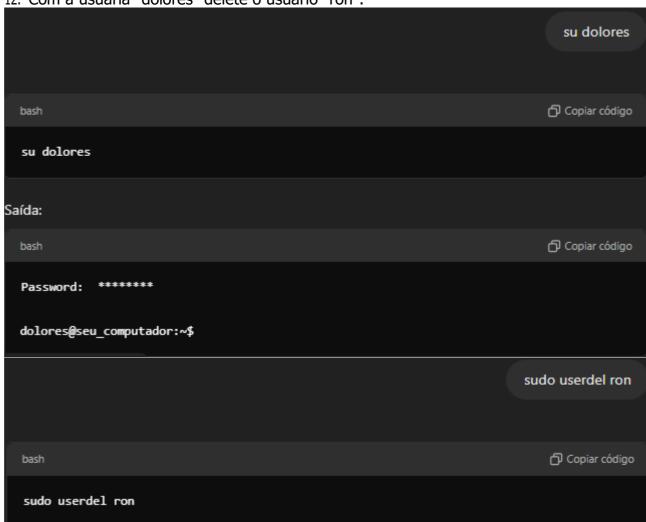

10. Com o usuário "harry" delete o usuário "draco".

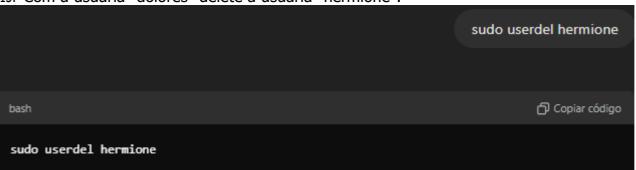

11. Adicione a usuária "dolores" ao grupo "sudo".

12. Com a usuária "dolores" delete o usuário "ron".

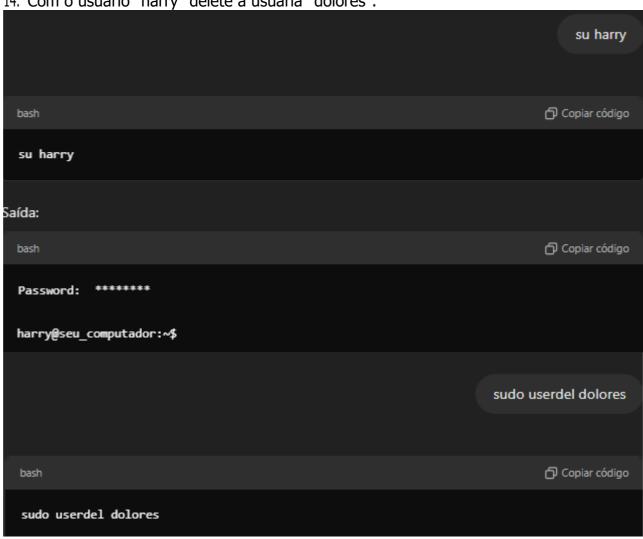

13. Com a usuária "dolores" delete a usuária "hermione".

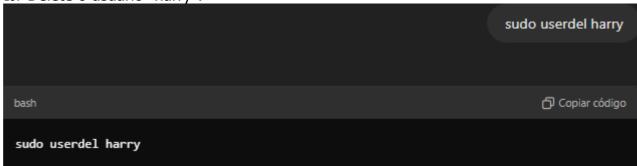

14. Com o usuário "harry" delete a usuária "dolores".

15. Delete o usuário "harry".

16. Verifique se todos os usuários foram excluidos em /home (exclua os usuários e seus arquivos).
